

Manufactured to the highest quality by Plastic Techniques, our complete range of bucket accessories is designed to ease the task of the linesman when working in the confined area of an aerial basket. Plastic products are all non-conductive and provide a safer, tidier work station, especially when working live on overhead lines.

## Bucket Liners

Manufactured from low density polyethylene with ultra violet inhibitor, PTI bucket liners are electrically tested to 50kV (70kV models also available) for one minute and come with a two year guarantee. Liners are available to suit all bucket shapes and sizes, please contact us to discuss your requirements. Standard colour is white but other colours are available, including 2-colour liners for easy visual inspection. Where required the liner can be ordered with a moulded in step.

Moulded Step

## Fit-All Cover

Fit-All Covers are made of heavy duty vinyl coated nylon. They are designed to fit virtually any size of bucket. A 2" deep foam insert is stitched into the cover to create a dome effect which eliminates puddling water.

CAT NO	DESCRIPTION
<b>FITALL-I</b>	Fits 24" x 24" (610mm x 610mm) bucket
<b>FITALL-II</b>	Fits 24" x 48" (610mm x 1220mm) bucket

## Tru-Fit Lids

Rigid, tough, polyethylene covers to seal your bucket against driving rain, ice and snow. They are designed to be easily fitted and removed by one person, and keep their shape with no shrinking, sagging or tearing.

A range of sizes are available, please contact us to discuss your requirements.
