

Tool Organisers

Tool organisers offer the maximum in space efficiency. They fit virtually all aerial lift buckets and are manufactured from thick, durable polymer. A wide range of layouts and holders is available, please contact us with your individual requirements.

Jumper Holders

Safely and conveniently store your jumpers for easy access, our jumper holders hang outside the bucket freeing up limited space.

Available for single or double jumpers.

Crimp Tool Holder

This holder fits virtually all aerial lift buckets. It is manufactured from semi-flexible polymer material with excellent dielectric, cold weather, chemical resistance and UV properties. Ideal for holding inline crimping tools such as the Klauke EK425L.

Chainsaw Scabbards

PTI chainsaw scabbards are designed to hold standard sized chainsaws and conveniently hang inside or outside the bucket.

A wide range of scabbards is available, please contact us with your individual requirements.

Impact Wrench Holder

Ideal for Stanley and Greenlee impact wrenches, offering the maximum in space efficiency. It is a non-fibreglass construction of semi-flexible polymer material with excellent dielectric, cold weather, chemical resistance and UV properties.

4 Pocket Tool Roll

4 separate pockets to hold tools - each pocket measures 5" x 12" x 2½". The roll is made of white vinyl poly shell which is strong, durable, lightweight and weather-resistant. Each pocket closes with Velcro fasteners.

Intensifier Holder

Securely holds hydraulic intensifier HB10 (see page B11) on aerial lift baskets. The extended protection safeguards hydraulic couplings from mechanical abuse and shields against brush contact. The special polyethylene formula is not affected by hydraulic oils and other contaminants.

CP2 Crimping Tool Holder

The CP2 holder is made with vinyl nylon fabric, and the base is reinforced with leatherette and has brass grommets for drainage and ventilation.
