

The Bulldog range of insulated digging tools has a solid forged steel head and socket, solid fibreglass shaft and a rubber collar to protect your hand. The tools feature a heavy duty glass reinforced nylon handle and glass nylon grip, securely bonded to the shaft; a solid fibreglass shaft, bonded into position for a secure fit; one piece solid forged special steel blade and socket. The blade is hardened and tempered for strength and rigidity then epoxy paint coated for hard wearing protection. All products conform to BS 3388; the collar incorporates a protective wear sleeve under the polymer. If the collar abrades in use and the wear sleeve becomes visible the tool must be replaced; round cornered blades, proven to dramatically reduce penetration damage to underground pipes and cables; each shovel is individually tested and supplied with a certificate of conformity and code marked for traceability.

Square Mouth Shovel

CAT NO	DIMENSIONS	LENGTH	HANDLE
