

## Outer Sheath Stripping Tools

A lightweight range of tools that quickly and easily perform a circumferential and longitudinal cut to a preset depth on outer sheath of cable. Pliers action is used to grip and remove sheath.

CAT NO	SHEATH DIAMETER
8YRO-PG2	21 - 35mm
8YRO-PG3	26 - 52mm
8YRO-PG4	47 - 75mm

## Insulation Stripping Tools

This tool strips insulation from medium voltage cables and allows the user to carry out a longitudinal and circumferential cut of the insulation.

CAT NO	CABLE DIAMETER
BRMRD1	14mm - 40mm
LH2	38mm - 60mm

## Bonded Screen Removal Tools

Universal tool for shaving the bonded semi-conductor layer of medium voltage cables. At the end of the shaving operation the stop can be made manually. Adjustable cutting depth up to 1.2mm (in steps of 0.1 mm).

CAT NO	CABLE DIAMETER
GB-P20	10mm - 50mm

## Adjustable Underground Cable End Stripping Tool WS50

Two handles permit safe, easy operation on XLPE, polyethylene and EPR insulation of any thickness. Safe clean cut prevents conductor damage. Covers range of 12.7 to 57.15mm diameter underground cable.

## Mid Span Strippers WS1 Series

Designed for hot stick operation, the WS1 strips cable to any length in one continuous operation. Each tool is manufactured for a single cable diameter and insulation thickness. Ideal for BLX and BLL conductor. For conductors 8.13mm to 20.07mm diameter. Standard tool comes with hook one end and ring the other end but also available as hook / hook or handle each end. Fixed blade length set to prevent the tool damaging the conductor.

CAT NO	CONDUCTOR SIZE
WS1-383	50mm <sup>2</sup> BLX Conductor
WS1-384	120mm <sup>2</sup> BLX Conductor
