

Horizon offers a wide range of sash lines and ropes including vehicle jib ropes, ladder ropes and ropes used for live working. Please contact us with your requirements.

Sash Lines

Our sash line ropes have a stranded polyester core with a soft, cotton outer sheath. This easily identifiable red rope is ideal for handling. Supplied in 8mm, 10mm, 12mm and 14mm diameters with safe working loads of 127kg, 320kg, 400kg, 425kg respectively (each with a factor of safety of 6) in lengths to suit your requirements. Rope can be provided with plain, sealed end or large or small spliced eye and with or without plastic thimble.

Manila Rope

Available in 10mm, 12mm & 16mm diameters and can be ordered in fixed lengths, by the bale or part of a rope block set.

Manila rope is a traditional natural fibre 3 strand rope. Because it is a natural fibre manila will shrink when wet and lengthen when dry. The diameter of the rope is measured during manufacture whilst the rope is under tension so the finished product may have a larger diameter than stated.

Blue Polypropylene Rope

3 strand polypropylene rope is probably the most versatile and widely used rope. Polypropylene rope is strong and great value. Easy to splice and can be used for various applications, ideal for use on ladders. Available in 6mm to 12mm diameters.

Polyester Rope

Ideal for running lines, rigging, block and tackle and other applications where minimum stretch, great strength and durability are required. Handles more like Manila than other synthetics, while having more than twice the strength plus excellent resistance to abrasion. Because of its resistance to rot and mildew the rope can be stored wet or dry. Often used in live working operations following appropriate company safety rules.

Available in $\frac{3}{8}$ " and $\frac{1}{2}$ " dia in reel of 600 feet.
