

## Multi Lifter

These versatile lifters offer ease of use combined with a reliable non-hydraulic design. By simple multiplication of mechanical effort, high cover breakout forces are achieved. The Multi Lifter breaks down into three compact components and fits into the boot of a small car. These powerful and rugged units have been designed with the lifting and handling regulations in mind.

By utilising a self-braking hand winch and by keeping within the HSE limits, Multi-Lifter goes a long way towards minimising the risk of painful and long lasting back injuries (45% of all lifting injuries are to the back). Available with a range of standard keys or keys to match the customer's exact cover requirements. The system can also be used to retrieve or raise heavy objects such as bell covers from the access chamber.

CAT NO	CAPACITY	SPREADER BARS	RETRIEVAL	AXLE WIDTH	MAX LIFT	LIFTS	WEIGHT
L001	250kg SWL	5kg each (L009)	1.2m	870mm	250mm	2 & 4 hole covers	38kg

## Jack Lifter

Designed to remove block-filled access covers in shopping precincts and other locations, these powerful lifters rated at 250kg will lift covers safely and with ease. The Jack Lifter breaks down into a narrow three-wheeled trolley allowing easy transportation to pedestrian sites by a single operator.

CAT NO	CAPACITY	SPREADER BARS	AXLE WIDTH	MAX LIFT	LIFTS	WEIGHT
L002	250kg SWL	5kg each (L009)	1100mm	210mm	2 & 4 covers	30kg

## Unilifter

Easy to use, one man operation, break out facility, compact storage and keys that can lock the cover to the spreader bar for additional safety are some of the features of this versatile lifter. It is designed to lift 2 and 4 hole covers by a single operator. Its high lifting capacity and extending axle enables it to lift most covers, including deep block type, using only mechanical advantage. The anti-tip and breakout screw jacks greatly facilitate removal of covers that are stuck in place. Capable of lifting covers up to 1 metre in length. The Unilifter may be assembled in one minute, can be broken down for easy storage and is available with a range of locking keys to match the customer's exact requirements.

CAT NO	CAPACITY	AXLE WIDTH	MAX LIFT	LIFTS	WEIGHT
L003	250kg SWL	1000mm	200mm	2 & 4 hole covers	23kg

## Midi High Lifter

The Midi High Lifter is a versatile medium duty lifter designed to lift 2 and 4 hole covers by a single operator. Its lifting capacity and extra width enables it to lift deep block filled covers using only mechanical advantage.

When used with the Universal Spreader Bar L010 it is capable of lifting covers up to 1 metre in length. It can be broken down for easy storage and is available with a range of keys to match customer's exact requirements.

CAT NO	AXLE WIDTH	MAX LIFT	LIFTS	WEIGHT
L004	840mm	180 - 215mm	2 & 4 hole covers	18kg
