

A versatile access system for instant roadways, car parks and ground protection – prevents ground damage.

Ground-Guard Protection Mats are manufactured from ½" thick recycled high-density polyethylene, and offer the perfect solution to churned-up landscapes and reduced traction for works vehicles.

Lightweight and easy to assemble, Ground-Guards can be locked into place to form a continuous, solid roadway or work platform. The product features a patented heavy diamond deck-plate design for maximum traction and is also available with a smooth reverse side for easy removal of dirt.

Available in a range of sizes, see page E02 for full specification. Ground-Guard Protection Mats are rigorously tested to ensure they are virtually indestructible and are guaranteed against breakage by vehicles of up to 50 tonnes.*

- ✓ Toughest boards on the market and guaranteed unbreakable by vehicles up to 50 tonnes
- ✓ Weather-proof, resistant to UV rays and environmentally friendly
- ✓ Easy to clean with water
- ✓ Stays the same weight wet or dry

- ✓ Safe and light-weight. Two men can easily lay trackway. No need for HIAB
- ✓ Different tread patterns to suit all applications
- ✓ No tools required for assembly
- ✓ 24 hour delivery available upon request

Plywood has long been the traditional method of ground protection but often breaks during first use. It splinters, warps, becomes water-logged and is awkward to handle and could cause injury.

Ground-Guard Protection Mats are so light and easy to handle that you don't even require a HIAB lorry to set them out. They can either be laid loose for temporary access, or clipped together (without tools) to form semi-permanent roadways and car parks.

Ground-Guards have been field tested in extreme cold and intense heat and are backed by a full 2 year warranty.

*50 tonne guarantee applies to 8' x 4' size. The 8' x 3' size is guaranteed up to 37 tonnes, the 8' x 2' size up to 25 tonnes, the 6' x 3' size up to 28 tonnes and the 6' x 2' size up to 19 tonnes.
