

The unique, patented, versatile Skipper Barrier System is designed to cordon off any area to create a safer work environment. The unit simply sits on top of a standard road cone or, with an adapter, on to an earth rod.

## Skipper Barrier System

- The high visibility, fully retractable tape extends to 9 metres, reducing the amount of cones required
- Locks in any position
- Saves time, storage space and money
- Robust and durable. Weighs only 800g
- The Skipper unit has a removable top for additional attachments, ie lights/signage
- Spring loaded spool ensures tape is held in tension, even if cones move
- Lockable button to prevent unwanted spooling of tape
- LED light accessory fits on top of Skipper unit
- Magnetic clip available for temporary attachment to metal objects (cars etc)

## Skipper/Earth Rod Restricted Zone Kit

We have developed an adapter that screws into a standard earth rod coupler allowing the Skipper to sit on top of an earth rod. When combined with the magnetic mount to attach to a vehicle this can be used to create a large restricted zone, ideal to keep public away from work areas.

The standard kit contains 4 x Skipper Barriers, 4 x earth rod adapters, 2 x magnetic vehicle mounts, 1 x draw string carry bag.

Magnetic Receiver Clip

Rechargeable Roar Light

CAT NO	DESCRIPTION
SK-1	Skipper Unit
MAG-CLIP	Magnetic Receiver Clip
SK-LIGHT	Rechargeable Roar Light
SK-1-KIT	Earth Rod Restricted Zone Kit

## Skipper MkII

The Skipper MkII is ideal for where a traffic cone is not suitable to cordon off a work area, such as engineers working in domestic residences or where space is limited in control rooms, power stations or any indoor application.

The Skipper unit contains 9m of tape and fits into one of four attachment accessories, the same accessories will also hold the tape end.

The **Clamp Holder/Receiver** is used to attach the Skipper unit to angular surfaces such as door frames, tables and desks. It can be positioned either horizontally or vertically, simply position the clamp in place and turn the screw to tighten.

The **Suction Pad Holder/Receiver** is ideal for attaching the Skipper unit or tape end to windows, doors and cupboards.

The **Magnetic Holder/Receiver** is used to connect the Skipper unit or tape end to metal surfaces such as racking or radiators, and the **Cord Strap Holder/Receiver** is used to attach to vertical posts, table legs, handles etc.

Other Skipper accessories such as light holders and sign holders can also be used with the Skipper MkII.
