Impact Wrench Utility Pole Auger Bits

Featuring a shank 7/16" hex with groove for positive fit into chuck of Stanley and Greenlee hydraulic impact wrenches. Single spur cutter and side lip bore through creosoted poles without binding. Extra-long twist is ideal for boring large poles. Full-length heat treated bit guards against bending in heavy-duty applications. Medium-fast screw point is ideal for general wood boring applications. Standard length 24", 18" lengths available on request.

SDS Max Masonry Drill Bits

Various lengths and diameters are available from 10-40mm dia and from 150-1000mm long. SDS Max masonry drill bits have a specially designed shank which enables them to fit into any machine with an SDS Max chuck. All these drill bits have a special L shaped flute profile for increased dust evacuation and are also ideal for concrete and brick. The SDS Max drills of 15mm diameter and above have four cutting edges.
