

## Microlite/Ultimate

**CAT NO: 45044**

Allows unique roof access making it the ultimate heavy duty industrial stand off. Quick and easy to fit to aluminium, fibreglass and timber ladders.

## Pro Stand Off

**CAT NO: 45004**

The Professional Stand Off fits to your ladder improving its safety and stability whilst you work. Positions the ladder away from the wall making access for guttering and window maintenance safer.

## Roof Rack Clamps

**CAT NO: 45016**

The simple and effective way to secure ladders to your roof rack.

## Ladder Stopper

**CAT NO: ST024**

The Ladder Stopper is manufactured from a 'T' shaped aluminium extrusion bonded into a 11mm vulcanised rubber base with 2mm deep grooves at the top and bottom. The weight of the ladder and its user are spread throughout the Stopper over a large area. Not only does the upright aluminium plate help prevent the ladder slipping outwards, it also helps prevent ladder flip where the ladder rotates due to overreaching.

## Ladder Straps

**CAT NO: LS-1NTR**

Based on a standard 25mm wide cam buckle strap, these 1 metre long straps should be used to safely and securely strap down ladders and scaffolding on to vehicle roof racks.
