

## Retractable Tool Lanyard & Single Tool Holster

Together the Cobra MkII and single tool holster provide a perfect tool solution system. The Cobra comes supplied with a single tool holster attached making it an ideal combination, ergonomically optimised design providing quick tool holstering and fast tool draw. Designed with single deep pocket suitable for a wide range of small hand tools, the holster will accommodate and fit on to standard (50mm) width existing universal tool belts. Rated for hand tools up to 5kg.

## Spiral Tool Lanyard

The rugged Spiral Tool Lanyard is a premium tool tethering solution specifically required for demanding and intensive applications. The lanyard provides superior user flexibility, combining expansion properties with swivelling end terminations for improved performance, making this ideally suited to daily work. Optimised reach and coil retraction minimises the likelihood of snagging and tripping associated hazards. The unique reinforced coil design dampens any impact force generated from a dropped tool. The lanyard is 44cm long and expands to 1.95m. Lanyard cable is 7mm in diameter with a 2.5mm coated steel wire core, encapsulated within a protective rubberised synthetic sheath. Rated for hand tools up to 5kg.

## Wrist Tool Lanyards

The wrist tool lanyard is attached with a Velcro strap or a belt buckle fastener to become the anchor point. A single tool attaches to the lanyard with a steel clip. This type of lanyard is very efficient for short-term tasks where a worker might be using a small hand tool throughout the duration of the task with small interruptions when the user's hands need to be free. Allows the hand tool to be easily accessible with a simple flick of the wrist.

Each wrist tool lanyard can be connected to the tool, directly from the 'D' ring or with a swivel attachment or via one of the following lanyards, polyester webbing loop, steel wire loop, elasticated webbing or spiral lanyard. Rated for hand tools up to 5kg.

Each lanyard has a unique sealed serial number label for your control and inspection.
