

The Viper product range is an exceptionally versatile all in one tool tethering solution for the individual working at height. Extremely user friendly with the ability to quickly and simply alternate the interchangeable Viper components.

The system allows the user to select the most appropriate combination of components to suit the scope of work activity, tool configuration and personal preference to encourage safe productivity.

The tethers are designed to work with existing hand tools, saving expensive outlay on new tools. Viper tethering products simply and cost effectively adapt your existing hand tools to be able to be used safely at height, ensuring workers conform to legislation.

The Viper range is dynamically rated for hand tools weighing up to 2.5kg, manufactured with a safety factor that is over 36 times the maximum tool weight.

Electrical Conductivity and Resistivity Test*: Dry >200GΩ / Wet >10MΩ

*Wiring regulations (BS 7671). Live working hand tools (EN 60900).

Every component of the Viper set is certified and has a unique serial number for traceability and recording of inspections. All items are shipped with a 'Declaration of Conformity' product certificate and 'Final Inspection' sheet. The Viper is designed, tested and manufactured in the UK.
