

BrushBlade™ Linesman's Knife

MADI is a manufacturer of innovative utility tools for linesmen. The tools shown are manufactured from non-conductive material which is durable and lightweight. The wire brushes are all easily replaceable and the tools come with a built in snap ring, to allow use with a grip-all or for storage on belt hooks and bucket hooks.

- Blunt tip blade
- Built-in non-conductive snap-ring
- Blade can be closed when not in use
- Locks in open position to prevent accidental closing
- Reversible thumb stud for quick, one-handed opening from the left or right
- Stainless steel black oxide coated blade for maximum durability and sharpness
- Integrated wire brush is easily replaceable
- Cleans conductors up to 30mm diameter to make better connections

CAT NO	DESCRIPTION
BB-1	BrushBlade - Linesman's Knife™
WB-1	Replacement Wire Brush

Dogbone™ Wire Brush

- Uniquely designed to make wire brushing easier and more convenient
- Has two colour coded brushing surfaces, one side for copper, the other side for aluminium
- The round wire brush cleans conductors up to 40mm diameter

CAT NO	DESCRIPTION
DBWB-1	DogBone™ Wire Brush
LWB-1	Large Replacement Wire Brush

FlatRound™ Wire Brush

- The FlatRound™ has two designed brushing surfaces, one side for flat connections and the other for round connections
- The flat wire brush can be used on any surface, such as flat pads on the pad-mounted transformer and all cable to flat connectors
- Transmission applications; the flat side can also be used on all dead-end single-tongue and jumper-terminal connectors
- The round wire brush cleans conductors up to 40mm diameter
