

Redefining lever-operated hoists, the YaleERGO 360 features the revolutionary crank handle that allows for efficient operation in both lifting and pulling applications. Ergonomically designed for increased safety, the patent-pending YaleERGO 360 lets the operator work up to 12 times faster and with as much as 30% less force than with conventional ratchet lever tools.

Features & Benefits:

CRANK HANDLE ①

This first-of-its-kind lever handle design will revolutionise the ratchet lever hoist industry. Its unique foldable lever handle and 360° rotating action increases productivity while reducing the risk of operator injury. Design keeps the operator's body aligned with the load chain, reducing the risk of the twist effect - when a hoist twists around the chain. No need to use a second hand to stabilise the hoist. Operator can securely grip the grooved, no-slip handle.

CONVENIENT DIRECTIONAL INDICATOR ②

Easy-to-use, highly visible directional indicator located on the handle clearly shows the operating direction as lifting, lowering or neutral. Selector lever on the inside of the handle locks in place to prevent accidental switching. ③

EASY & SMOOTH FREE CHAINING ④

For quick take up and positioning of slack chain - even with one hand. Designed not to accidentally free chain while under load. Cast chain end stop allows the user to easily position the chain in free-chaining mode and prevents it from entering the liftwheel and jamming the hoist.

EASILY CARRY & TRANSPORT WITH JUST ONE HAND ⑤

When folded out, the lever handle can serve as a carrying grip for easy transport. Simply attach the end stop to the hook and slip the hook onto the crank handle to lift and carry the unit with one hand.

EASY-TO-INSPECT SWIVEL HOOKS ⑥

Bolt on hooks with nylon locks simplify the inspection process. Hooks are forged, allowing them to yield under overload without breaking. Cast safety latches provide positive and secure load engagement.

BUILT TO LAST

Lightweight aluminium housing withstands rigorous use and features high-quality, long-lasting bearings. Powder coat finish provides extra protection in harsh environments.

EXCELLENT CORROSION PROTECTION

Robust chain guide and chain stripper made from cast steel and zinc-plated for corrosion protection.
